Subject: Microsoft Settlement

I have been using computers since 1966, have read the proposed settlement and think that it is very fair. MS has made computing simple and very very productive. I use MS products to operate my business.

While some would like to distroy MS, they are motivated by greed and anger. The punishment should fit the crime and the current settlement goes way beyond the crime. Let us move beyond this case and move forward to new innovations. Settle it now!
